

Deadend: <http://farragofiction.com/Gigglesnort/>

0 http://farragofiction.com/SBURBSim/index_shogun.html

Check aspect symbol, what are some weird facts about it? (it's a bmp)

Why aren't bmps normally used on web? (They are uncompressed. Plain text).

Find next step inside bmp.

1 <http://farragofiction.com/WholsShogun/>

“What is this? Do you think it relates to something else? Also. Apropos of nothing. I wonder. If you can put numbers. In URLs. Like.....say. <http://www.farragofiction.com/???>”

Clicking calculate gets you 5179.

- 1a <http://farragofiction.com/5179/>
 - Clicking calculate gets you 3764.
- 1b <http://farragofiction.com/3764/>
 - “No. Stop that. It's not helping any more. Think harder, dunkass.” dead end. (calculate is 5679).

1 False: <http://farragofiction.com/13/>

Fake ending, has trove things here, if you click on text box it crosses off the charms me and shogun doesn't have, if you type moons diamonds horseshoes balloons stars = 4037

2 False: <http://farragofiction.com/4037>

Fake ending, you get told to message me in the corrupted leperchaun image.

2 (hint stage) <http://farragofiction.com/1277/> ← putting in “Who is Shogun?” into any of the boxes gets you here.

[illegible]

Ghoa and DQ0N

Typing ghoe (all lower case) gets you **415**, which gets you ghoe and a bunch of ghoe, but the image is named 275.png so that's a second hint to get to DQ0N if somehow you didn't think to put it in directly.

typing DQ0N gets you **275**, which is a glitchy picture of the Deacon of Madness. Inside is I have a Name and my Name is My Name.
Repeated over and over because remembering your own name exists is how you get out of his control. Putting that in the thingy gets you 3034 which just gives you 44598

3 <http://farragofiction.com/44598/>

At first glance looks identical to 1277. But hidden in text box is a bmp, which is corrupted with links to a youtube video.

4 <https://www.youtube.com/watch?v=dhssKE8TWJk>

Video itself is memey Shogun related bullshit.
Description is a number. 168520691708

5 <http://farragofiction.com/168520691708/>

BG plays repetitive music with clear notes. Inspecting reveals the song is SHOGUN_IS_THE_SHOGUN.ogg and SHOGUN_IS_THE_SHOGUN.mp3 There is also a secret http://farragofiction.com/168520691708/SHOGUN_IS_THE_SHOGUN.svg which is the sheet music. Putting the notes of the song with no spaces into the puzzles gets you the current final tier 823.

5a: alt path says "Not a music fan? Maybe you should get a life: Seriously, Who is the Shogun?(Don't Know Who the Shogun is):____

“

5b: completed scene path gives you the number1123

5c: <http://farragofiction.com/1123> has the reverse card in plane sight that is also stored at 823

5d: <http://farragofiction.com/58913189956/> is the path from 609 where cactus's unity app is stored, its a log of an uno game, the word "reverse" is redacted and the whole page is reversed.

6. <http://farragofiction.com/823/>

, but the bmp isn't where it is normally hidden .Instead, you must guess you should go to http://farragofiction.com/823/SHOGUN_IS_THE_SHOGUN.bmp This is now of an unmodified UNO REVERSE CARD.

7a. <http://farragofiction.com/732/> or 764 (for leading cap)

If you put the word "reverse" into the text box you get here. It hints that you didn't do it right. 'Wait, REALLY, y Seriously? But if that's right....where's the next clue? Or the ending? What's going on?' Clue: "Listen to the Heart of the Cards"

7b. <http://farragofiction.com/237/> or 467 (for leading cap)

If you reverse the number you get from the Reverse number, you get here, hidden text says 'Why does SHOGUN even HAVE an associated UNO card? Oh, also:

ThisIsTheNextStepDunkass (you know the rest don't worry about it). (Unless you came here out of order, I suppose). (You wouldn't do that though, would you?) (Skipping steps, rushing ahead). (That sounds like a CLASSIC maturity quest kinda shit for a Waste). (Gotta learn to do shit right, man.) (At least MOST of the time.) (Not that this is a Waste puzzle, mind you.) (That was LORAS.) (This is just a Shogun puzzle spearheaded by a Waste and a group of mostly other Wastes.) Next step is stored in ThisIsTheNextStepDunkass.bmp

Plans: Multiple paths. Phrases or numbers you can get from LORAS images dealing with shogun, or Alchemy shit.
